

## Strain Gauge Amplifier Model 781H for top rail assembly

- Tare function via control line
- 250 Hz filter in standard execution
- 2,5 kHz or 10 kHz filter optional
- Amplification configurable
- $\pm 5$  V /  $\pm 10$  V output signal
- Optional 4...20mA output signal

### Main features

The measuring amplifier 781H for assembly to mounting rails (EN 50022) is available with a voltage output  $\pm 5$  V,  $\pm 10$  V and power output 4... 20 mA.

The force sensor is connected with the terminals 1 to 4.

The voltage supply (11-28 V) is connected with terminal 5 and 8 (ground).

For zero setting the terminal 6 is connected with the power supply or a control signal is applied between 5 and 24 Volts.

The amplification can be switched 1-2-4-10-fold with internal jumpers.

If the input signal is negative for power output 4... 20 mA, output follows up to 0 mA.
