

## FIST Generic Rack

FIST is Raychem's Fiber Infrastructure System Technology.

The Generic Rack, FIST-GR2, is an all-purpose metal rack designed to accommodate the FIST fiber management system in an exchange, head end or customer premises environment.

FIST-GR2 is typically used to house connector panels and separate shelves for splicing, patching, equipment and devices.

The unit has the following features:

- Depth and width in accordance with ETSI
- Many rack configurations are possible by using different combinations of the base frame and side duct(s)
- ETSI mounting profiles with cage nuts for shelf mounting are provided at the rear of the rack, allowing optimal access from the front
- Horizontal and vertical patchcord management (HPM and VPM) for storage of functional patchcord overlength
- Horizontal and vertical patchcord storage (HPS and VPS) for excess patchcord overlength between the shelves and either the equipment or adjacent racks
- Bend control on all fiber routing
- A structured division and distribution of the cable elements
- A wide variety of options
  - Cable attachment plates can be mounted in any location (top/bottom) in the side duct
  - Mounting bracket adapters for 19" shelf mounting
  - Equipment mounting bracket adapters
  - Easy access to cables, pigtails and jumpers during installation, maintenance and upgrade
  - Easy adaptation to specific applications by variation of the rack configuration, the shelf configuration and routings of pigtails and jumpers
- Various mounting options
  - Wall mounting: stand alone or multiple side-to-side mounting
  - Back-to-back mounting
